

Smart. Sustainable. Seamless. **Specialty Packaging Loop**

At Callan JMB, sustainability isn't an afterthought - it's engineered into every shipment.

Unlike disposable shippers, the Callan JMB Closed Loop System is a high-performance, efficient thermal system providing superior customer experience. Even Callan JMB shippers that are no longer usable are never sent to a landfill - they are 100% recycled. From packing and delivery to return, sanitization, and re-use, our process reduces waste.

Our team will match you with the right specialty shipper that best meets your needs.

The package is received by Callan JMB, reclaimed, sanitized, and reused.

Use the included return label to send the shipper directly to Callan JMB.
